## Sample Resume Career Objectives – Best Sample CV Objectives

The importance of including a career objective on your CV (Curriculum Vitae) cannot be overstated. This is a short statement, two or three lines long which sums up your goals and helps employers to decide whether or not you are suitable for their company. This is the first thing employers come across when reading your resume or CV, and can make the difference between them reading the rest of it and throwing it away, so make sure you take your time and think of a powerful and effective opening statement which sums you up perfectly.

If you're stuck for ideas, why not take a look at some of the career objective examples below which are tailored to suit people seeking jobs in ICT, computing as hardware technicians, network administrators, Wireless LAN experts, software engineers, Cisco, CCNA, CCNP, CCIE career jobs, CompTIA A+, Network+, Security+ jobs as well as Microsoft MCSA, MCSE and MCDBA jobs.

- To excel in my chosen field in a job that both challenges and inspires me, while pushing me to work to the best of my abilities and produce the highest quality work that I am capable of.
- To work in an environment which encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately.
- To surround myself with motivated, skilled professionals in a job with opportunities for career development and advancement with hard work and dedication.
- To fulfill my dream of becoming a successful computer hardware and networking engineer and have a job which challenges me every day.
- To enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges.
- To secure an entry level position in a professional company where I can learn and develop my skills whilst assisting the company in their professional efforts to the best of my abilities with a devoted and

trustworthy attitude.

- To obtain a position in a large global company that will utilize my knowledge of computing and engineering and allow me the freedom to work with other like-minded individuals in a dynamic, inspiring environment.
- To continue my already established career with a reputable company and contribute my outstanding skills of honesty, team-work and extremely thorough research skills.
- To work towards a job within an organization where I am in a position of responsibility, and am able to use my skills and experience to commit myself to achieving organizational goals and targets efficiently and successfully.
- To be a professional and dedicated employee in a company that I can provide with my extensive technical skills and experience.
- As a recent graduate, I am seeking a role which allows me to continue learning and perfecting my skills as I provide high-quality work, and encourages me to flourish as a network technician.
- I am looking for a challenging job with a rapidly growing organization that can provide me with a range of goals and job objectives within a contemporary and economical business setting.
- I strive for continuous progress in everything I do, both personally and professionally, and so am keen to secure role which allows me to enhance and develop my all-round skills and abilities.
- To build my career in a leading corporate environment dealing with cutting-edge equipment and technological developments that will allow me to utilize my self-motivated and honest nature.
- I am seeking a job which supports my professional self-development and allows me to forward the aims of the company by providing key skills and work to complete organizational goals and targets.
